Summary
I am an agile front end developer with 12 years of experience working in demanding and high-traffic websites. I'm used to working in continuous integration projects that use Scrum as their development methodology. I've worked on various projects with different responsibilities, ranging from end-to-end website development, bug fixing, server administration, cloud content migration and interaction with the client. I'm specialized in client-side code and modern frontend frameworks, React being the framework I'm most happy working with.

Experienced with:
react, typescript, redux, redux saga, webpack, jest, cypress.io, styled components, sass, node.js, git, CI/CD, agile

Edgewater Markets
Front End Developer
Aug 2022 - Present

Edgewater is a fintech company that provides a high performance, customisable FX trading platform for banks, asset managers, brokers and other financial institutions, with a development team spread across London, New York and Singapore. In my role I was the driving force for introducing industry best practices, mentored junior developers, and implemented new major features working with colleagues across 3 different time zones.
Tech: react, typescript, styled components, websockets, scss, material ui, ag grid, circle ci, jest, aws

Sensyne Health
Contract - Front End Developer
Nov 2021 - Apr 2022

Developed new features for the Diabetes Monitoring app, a react web app used by clinicians to track patient's blood sugar readings, enhancing patient care and treatment recommendations. Contributed to the development of the company's flagship product, Sensight, a tool for visualizing cohorts to assist and inform clinical trials, improving the efficiency of trial design and execution.
Tech: react, typescript, hooks, react query, styled components, material ui, circle ci, cypress.io,

jest, react testing library

Agora Digital Capital Markets
Contract - UX Consultant
Jan 2021 - Aug 2021

Go-to person for all things frontend, championed best industry practices, and refactored the frontend architecture, improving code quality and maintainability.
Increased unit test code coverage dramatically, enhancing software reliability and reducing bug incidence, and end-to-end integration testing, ensuring seamless functionality across all system components.
Tech: react, redux, redux sagas, typescript, hooks, ag grid, websockets, teamcity ci, cypress.io, jest

WalkUp
Contract - Front End Developer
Sep 2020 - Dec 2020

Assisted in finishing features and meeting important deadlines by developing new components for their storybook component library, enhancing the user interface and user experience.
Built new features in their customer-facing app and the restaurant management system, improving functionality and user satisfaction.
Tech: react, redux, typescript, hooks, styled components, circleci, storybook

Sainsbury's
Contract - Front End Developer
Jan 2020 - Jul 2020

Worked as part of the Petal team, responsible for implementing and delivering new features for their new Insights Platform, a tool for creating data reports to visualize consumer trends and sales data.
Collaborated with offshore team members to successfully deliver established goals and milestones, overcoming timezone challenges to meet project deadlines.
Tech: react, redux, recompose, babel, webpack, d3, jest, enzyme, storybook

Festicket
Senior Front End Developer
Feb 2019 - Dec 2019

As part of the Ecommerce and Payments team, I contributed to improving the customer journey from the shop page to the checkout process.
Worked closely with Product Managers and Backend developers to develop new features, doing code reviews, as well as making performance optimizations, identifying areas for improvement and implementing solutions to enhance site speed and user experience.
I assisted Junior Developers, providing guidance and helping them with their tasks.
Tech: typescript, react, redux, redux sagas, webpack, styled components, cypress.io, storybook

Outlyer
Senior Front End Developer
Jan 2017 - Dec 2018

Collaborated closely with the Lead UI Developer to develop new features and maintain the first version of the product, a self-service DevOps monitoring solution. This involved understanding client needs, planning feature development, and implementing solutions in a timely manner.
Played a key role in the creation of version 2 of the product, building from scratch an advanced and modern web app with complex visualizations and user interactions. This required a deep understanding of user requirements, innovative thinking, and strong technical skills.
Managed the demands of high-profile clients, including Netflix, ensuring their monitoring needs were met by delivering high-quality, reliable tools.
Eventually took over as the sole responsible for all frontend aspects of the product, demonstrating leadership, technical expertise, and the ability to work independently.
Led the hiring process for a new developer to join the team, assessing technical skills and cultural fit to ensure a successful hire.
Tech: react, functional reactive redux, webpack, gulp, less, immutable.js, lodash, jest, enzyme, cypress.io

Come.pt
Founder/Full Stack Developer
Apr 2016 - Dec 2016

Worked transversally across all aspects of the project development, developing both frontend and backend, demonstrating versatility and a wide range of technical skills.
Integrated with third-party services for performance metrics and user analytics, providing valuable insights for product improvement.
Tech: react, redux, react native, webpack, bootstrap, css modules, jest, python, django

PokerStars
Contract - Senior Web Developer

May 2015 - Jan 2016

Worked on the company's Sportsbook Betting product, improving and scaling the frontend framework, enhancing product performance and user experience.
Introduced best industry practices and refactored big legacy code app components, improving code quality and maintainability.
Implemented an Integration testing framework, ensuring the seamless functionality of the product.
Tech: marionette, webpack, gulp, bamboo, jira, git, webstorm

Tag Worldwide
Contract - Front End Developer
Sep 2014 - Mar 2015

Worked as part of a Scrum team, extending features and improving performance of the company's Asset Management System, Symphony, enhancing user experience and system efficiency.
Tech: backbone.js, underscore.js, require.js, jquery, grunt, jasmine, jira, handlebars, less, git

Hogarth Worldwide Ltd
Front End Developer
Feb 2014 - Sep 2014

Owned the front end of the project, CopyCentral, a web-based application for managing and coordinating efforts with advertising agencies, improving project management and coordination.
Tech: backbone.js, underscore.js, require.js, jquery, grunt, jasmine, html5, less, git, github

Gamesys
Front End Developer
Apr 2013 - Feb 2014

Worked within a team developing a Poker App for Facebook, developing new features, writing unit tests, and bug fixing, enhancing app functionality and user experience.
Tech: backbone.js, underscore.js, require.js, jquery, grunt, jasmine, html5, sass, svn, git

Blip.pt
Front End Engineer
Nov 2010 - Apr 2013

Worked on several projects including the new sports website for Betfair, the largest betting exchange company with 4 million users, enhancing user experience and site functionality. Developed additional features for Loveblip (now known as WeGoOut), an online dating service, and was responsible for content migration to Amazon S3, ensuring data security and accessibility.

Tech: freemarker, cross-browser css (2/3), javascript, yui3, yaml, jasmine, php5, jquery, amazon s3
